MELTRIC HP-Rated DS200 Tops Industry as Most Powerful Switch-Rated Device

Franklin, Wis. — MELTRIC’s Switch-Rated DS200 plug and receptacle has been upgraded to include horsepower (hp) ratings from 40-100, depending upon voltage.

The enhanced product also boasts a rating increase to 600VAC and a new 6-pilot configuration. The upgrades make the DS200 480 and 600VAC 100 hp configurations the most powerful switch-rated device in the industry.

The DS200 with hp and motor circuit switch ratings is now an NEC-compliant motor disconnect. The new ratings fill the gap between 75-100 hp where the NEC requires a specific hp-rated disconnect.

DS200 Switch-Rated plugs and receptacles feature MELTRIC’s spring-loaded, silver-nickel, butt-style contacts. The devices are built to withstand corrosive environments, while delivering exceptional performance and reliability. Receptacles include standard lockout holes for easy NFPA 70E lockout/tagout compliance.

A full line of accessories is available for DS200 Switch-Rated plugs and receptacles. [Click here](#) for additional product details.

Shipment of the upgraded DS200 will begin on March 18th.

Franklin, Wis.-based MELTRIC manufactures a comprehensive line of high-performance industrial plugs and receptacles for use in power supply and control applications. Visit meltric.com to learn more about our industry-leading products.
