

The **SAFE** Way to get Power Where you Need it

Custom Power Distribution Solutions with Switch-Rated Plugs & Receptacles

Horizontal 6-Gang Boxes

Ideal for work-site power distribution to welders and other portable equipment. Commonly used in shipyards and construction sites.

Switch-Rated Connections

With their UL & CSA ratings for disconnect switching up to 200A and 75 hp, MELTRIC's switch-rated plugs and receptacles ensure safe connections, even under load.

Rubber Boxes

Durable rubber material withstands rough handling. Convenient size and shape makes it easy to move around job site. Commonly used at construction sites and aggregate processing facilities.

Prevent Exposure to Live Parts & Arcing

With their dead front construction and safety shutter, switch-rated plugs & receptacles eliminate user exposure to live parts and arcing. Operating them is a risk hazard category 0 operation, so compliance with NFPA 70E is simplified.

Vertical Power Panels

Ideal for high amperage power distribution to large equipment or to secondary power distribution boxes such as the Horizontal 6-Gang boxes shown above. Commonly used in shipyards.

Simple Lockout-Tagout

Standard provision on plugs permits easy Lockout/Tagout

Optional Lockout/Tagout provisions are also available for receptacles

Wall Boxes with Integral Circuit Protection

Provide extra protection with local fusing or circuit breakers in an integral package or in combination with an auxiliary bladed disconnect switch.

Protect Users with 100kA Short Circuit Ratings

Meltric's switch-rated plugs and receptacles have up to 100kA short circuit closing and withstand rating when used in circuits protected by RK1 current limiting fuses.

Dual Voltage Boxes – Non-fused

For plugging in both heavy duty equipment such as welders or lighter duty equipment such as power tools. Commonly used in automotive industry and other large manufacturing facilities.

Durability Ensures Long-Term Safety

Transformer Panel Packages

Transformer Panel Packages are available in a wide variety of configurations. The vertical assembly shown is easily transportable. Commonly used in construction sites and portable plants.
