

Metal Handle for DR400 model

new product description

A new metal handle is now available for the DR400 only.

This new handle provides ample wiring space to accommodate larger wire sizes. The new handle has a larger diameter and it is also longer than Meltric's standard metal handle. The new handle will also accommodate up to a 3" NPT.

The most noticeable design feature of the new oversized metal handle is the two external handles which facilitate operation of the device; as well as, making them easy to carry.

ordering instructions and pricing

| NPT | Part Number | Where Used |
|--------|-------------|------------|
| 2" | 4MH2 | DR400 |
| 2 1/2" | 4MH212 | DR400 |
| 3" | 4MH3 | DR400 |

Notes:

- Oversized metal handles will be added to the PDF version of the 2015 catalog on meltric.com.

faq

Is the oversized metal handle available for other models?

We expect to have oversized metal handles for DS200 models around the end of 2015.
