

Oversized Metal Handle

new product description

A new oversized metal handle is now available for DSN150, DS100 and DR150 models.

This new handle provides ample wiring space to accommodate larger wire sizes. The new handle has a larger diameter and it is also longer than Meltric's standard metal handle. The new handle will also accommodate up to a 2 1/2" NPT.

The most noticeable design feature of the new oversized metal handle is the two external handles which facilitate operation of the device; as well as, making them easy to carry.

ordering instructions and pricing

NPT	Part Number	Where Used
3/4"	9MH34	DSN150, DS100, DR150
1"	9MH1	DSN150, DS100, DR150
1 1/4"	9MH114	DSN150, DS100, DR150
1 1/2"	9MH112	DSN150, DS100, DR150
2"	9MH2	DSN150, DS100, DR150
2 1/2"	9MH212	DSN150, DS100, DR150

Notes:

- Oversized metal handles are included in the 2015 catalog.
- Pricing is included in the printed and PDF copy of the 2015 price book.
- Pricing for the 9MH2 was published in the 2015 price list spreadsheet. Unfortunately, this spreadsheet includes pricing for the 9MH114 which is incorrect.

faq

Is the oversized metal handle available for other models?

We expect to have oversized metal handles for DS200 and DR400 models around the end of 2015.
