10 HP, 480VAC

LISTED 49B6

63-34043  
SWITCH-RATED RECEPTACLE/CONNECTOR  
MOTOR CIRCUIT DISCONNECT SWITCH  
BRANCH CIRCUIT DISCONNECT SWITCH

### what is IP69k

IP69K is the highest level of protection in the IP rating scale.

The IP69K rating is needed where high pressure and high temperature washdown is used to sanitize equipment. The test specification was initially developed for road vehicles that need regular intensive cleaning but it has been widely adopted in the food industry as a test of products to withstand sanitary washdown.

### other notes

- Website and literature has not yet been edited to reflect the new ratings. Most digital changes will be implemented in September.
- Pricing and part numbers for DSN devices will remain the same.
- DSN150 with metal casings will not be IP69K rated.
- DSN24c and DSN37c Multipin devices are not IP69K rated.
