

# MELTRIC® & NFPA 70B

## Making Electrical Equipment Maintenance Simple

**Did you know**

Insurance providers increasingly require NFPA 70B compliance? MELTRIC simplifies inspections, audits, and reporting.

## Power Safer, Smarter, and Simpler

MELTRIC® **Switch-Rated Plugs and Receptacles** simplify procedures for compliance to the new NFPA 70B standards. DSN and DS devices ensure visual verification of zero energy at every stage. This supports NFPA 70B compliance through all phases of the equipment lifecycle, such as installation, maintenance, and repair.

## How MELTRIC Meets NFPA 70B Standards

MELTRIC helps prevent costly outages and equipment damage, improves performance and energy efficiency, and supports compliance with OSHA and other regulatory requirements.

### REACTIVE MAINTENANCE

- **Field Repairable** for Fast Repairs
- **Reduced Downtime** with On-Site Serviceability

### PREVENTATIVE MAINTENANCE

- **Plug-and-Play Disconnection** for Safety Inspection
- **Visual Verification** of De-Energization

### CORRECTIVE MEASURE AFTER INSPECTION

- **Modular Design** for Easy Updates
- **Extended Equipment Lifecycle**
- **Reduced Cost** of Ownership

## Built-In Lockout/Tagout Capability

All **Switch-Rated devices** include standard provisions on the plug that allow users to perform lockout/tagout by simply inserting a lock through an existing hole on the device. The user only needs to provide the lock – no additional mechanisms are required.

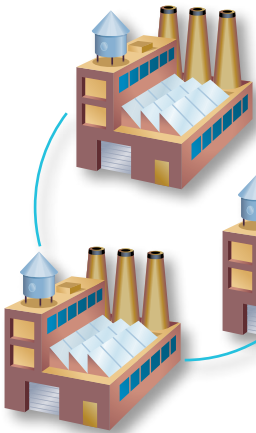

**With MELTRIC, all you need is a lock, which is inserted into the hole on the plug.**
