Rubber Boxes

Durable rubber material withstands rough handling. Convenient size and shape makes it easy to move around job site. Commonly used at construction sites and aggregate processing facilities.

Prevent Exposure to Live Parts & Arcing

With their dead-front construction and safety shutter, Switch-Rated plugs and receptacles eliminate user exposure to live parts and arcing. Simplifying NFPA 70E compliance.

Vertical Power Panels

Ideal for high amperage power distribution to large equipment or to secondary power distribution boxes such as the Horizontal 6-Gang boxes shown above. Commonly used in shipyards.

Simple Lockout-Tagout

Standard provision on plugs permits easy Lockout/Tagout. Optional Lockout/Tagout provisions are also available for receptacles

Dual Voltage Boxes – Non-fused

For plugging in both heavy duty equipment such as welders or lighter duty equipment such as power tools. Commonly used in automotive industry and other large manufacturing facilities.

Durability Ensures Long-Term Safety

Spring-loaded, butt-style contacts ensure optimal contact force even after thousands of operations.

Silver-nickel contacts maintain good conductivity even in wet corrosive environments

Spring-assisted terminals prevent loosening of terminal screws

Transformer Panel Packages

Transformer Panel Packages are available in a wide variety of configurations. The vertical assembly shown is easily transportable. Commonly used in construction sites and portable plants.
