

# PN20 RECEPTACLE

09-N4117

## SPECIFICATIONS

20 A

127-220 VAC

Type 4X

|                                  |                                           |
|----------------------------------|-------------------------------------------|
| Rated Current (A)                | 20 A                                      |
| Rated Voltage (V)                | 127-220 VAC                               |
| Contact Configuration            | 3P+N+G                                    |
| Ratings Information              | CURRENT INTERRUPTING                      |
| Environmental Rating             | Type 4X<br>IP 66/67                       |
| Impact Rating                    | IK09                                      |
| Material                         | METAL                                     |
| Metal Type                       | ZAMAK                                     |
| Product Color                    | BLUE                                      |
| Minimum Operating Temperature    | -40F<br>-40C                              |
| Maximum Operating Temperature    | 140F<br>60C                               |
| Wiring Capacity - Phase Contacts | 14 AWG – 8 AWG<br>SCREW TERMINAL          |
| Applicable Standards             | UL 1682<br>cCSAus<br>C22.2 No. 182.1-07   |
| Accessory Size                   | 1                                         |
| Base Drawing Number              | <a href="#">09-n4xxx.pdf</a>              |
| Catalog                          | <a href="#">meltric-catalog-pn-en.pdf</a> |
