

# P66 INLET

4168047726

## SPECIFICATIONS

660 A

480 VAC

IP66/IP67

|                                  |                                |
|----------------------------------|--------------------------------|
| Rated Current (A)                | 660 A                          |
| Rated Voltage (V)                | 480 VAC                        |
| Contact Configuration            | 3P+N+G                         |
| Auxiliary Contacts               | +8 AUX                         |
| Environmental Rating             | IP 66/67                       |
| Impact Rating                    | IK10                           |
| Material                         | METAL                          |
| Product Color                    | GRAY                           |
| Minimum Operating Temperature    | -40F<br>-40C                   |
| Maximum Operating Temperature    | 140F<br>60C                    |
| Wiring Capacity - Phase Contacts | SCREW TERMINAL                 |
| Accessory Size                   | 8                              |
| Base Drawing Number              | <a href="#">4168xxx726.pdf</a> |
