

# Product Improvement Announcement

## DSN/DXN 120° and 180° Lid for Poly Receptacles

Issue date: 25 August 2022

### Product Improvement

The DSN20, DSN30, and DSN60 all will receive updates to their receptacle casings. The lid on the receptacle casings will now automatically open to 120° and can manually be opened to 180°. This functionality is now uniform across the DSN series receptacles with poly casings. This change will be effective for these models by the end of the 4th Quarter of 2022. Specific cutover dates will depend on stock levels and incoming orders. The DSN20, DSN30, and DSN60 previously opened to 180° only.

## FAQs

---

### **Can I still order the -180° option for the 180° lid?**

The 180° is no longer available on the DSN20, DSN30, DSN60, DXN20, DXN30, and DXN60 because this feature is now standard.

### **Are there new part numbers for the receptacle casing?**

No. The catalog part numbers on the poly receptacle will stay the same.

### **Will there be a price increase?**

Pricing will remain the same.

### **Does this update apply to metal casings?**

No. The metal casings do not have the 120° stop. They only open to 180° standard.
